## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1, 3-5, and 7-9 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1 and 3-5 are allowable over the prior art of record because the prior art of record does not teach or disclose a coil assembly for a probe coil to be used in a system for detecting a nuclear quadrupole resonance signal in a substance, the spiral coil arrangement is configured in a saddle shape, the saddle shape having a central portion and a pair of coextending outer portions, the central portions of the sections being disposed in opposing spaced apart relationship about a common axis coincident with the centre points of each coil section, in combination with the remaining limitations of the claims.

Claims 7-9 are allowable over the prior art of record because the prior art of record does not teach or disclose a coil assembly for a probe coil to be used in a system for detecting a nuclear quadrupole resonance signal in a substance, wherein the coil winding varies in accordance with a logarithmic winding scheme defined by the expression:  $r_{n+1} / r_n = \ln(1 + a(n+1)) / \ln(1+an)$ , where  $n$  is the number of spiral turns,  $a$  is a parameter used for optimization,  $r_{n+1}$  and  $r_n$  are distances from the centre of the spiral to the  $(n+1)$ -th and the  $n$ -th turns, in combination with the remaining limitations of the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
